Internetworking with routers in Cisco packet tracer Simulator.

Aim:

To design and configure a simple internetwork using a router, wireless router, DHCP server and internet cloud in Cisco packet Tracer and to verify network connectivity

Procedure:

1. Internetworking using a Router

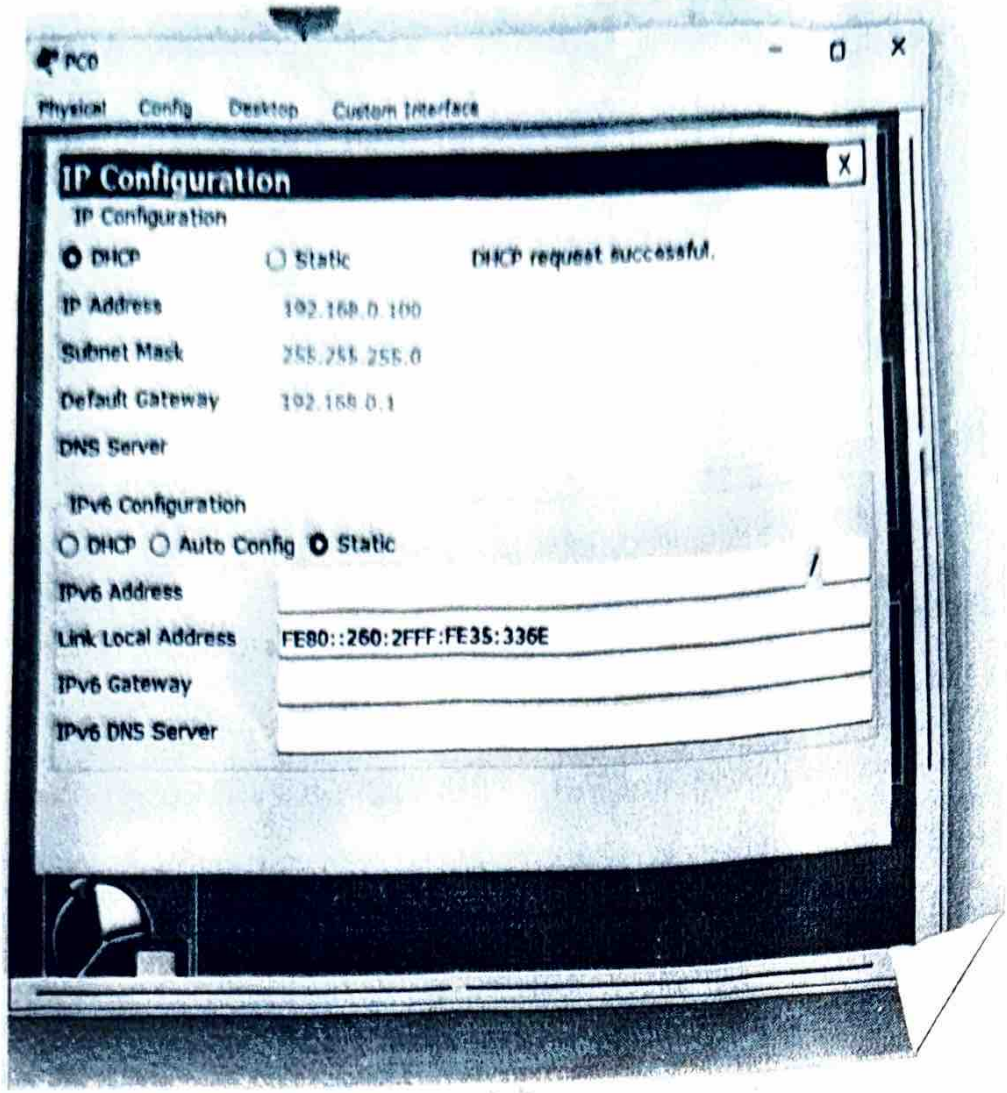

1. Open Cisco Packet Tracer and add one router
2. Connect both PCs to the router using copper straight through cables.
3. Configure the router using CLI
4. Test connectivity using Simple PDU or Ping 192.168.20.2

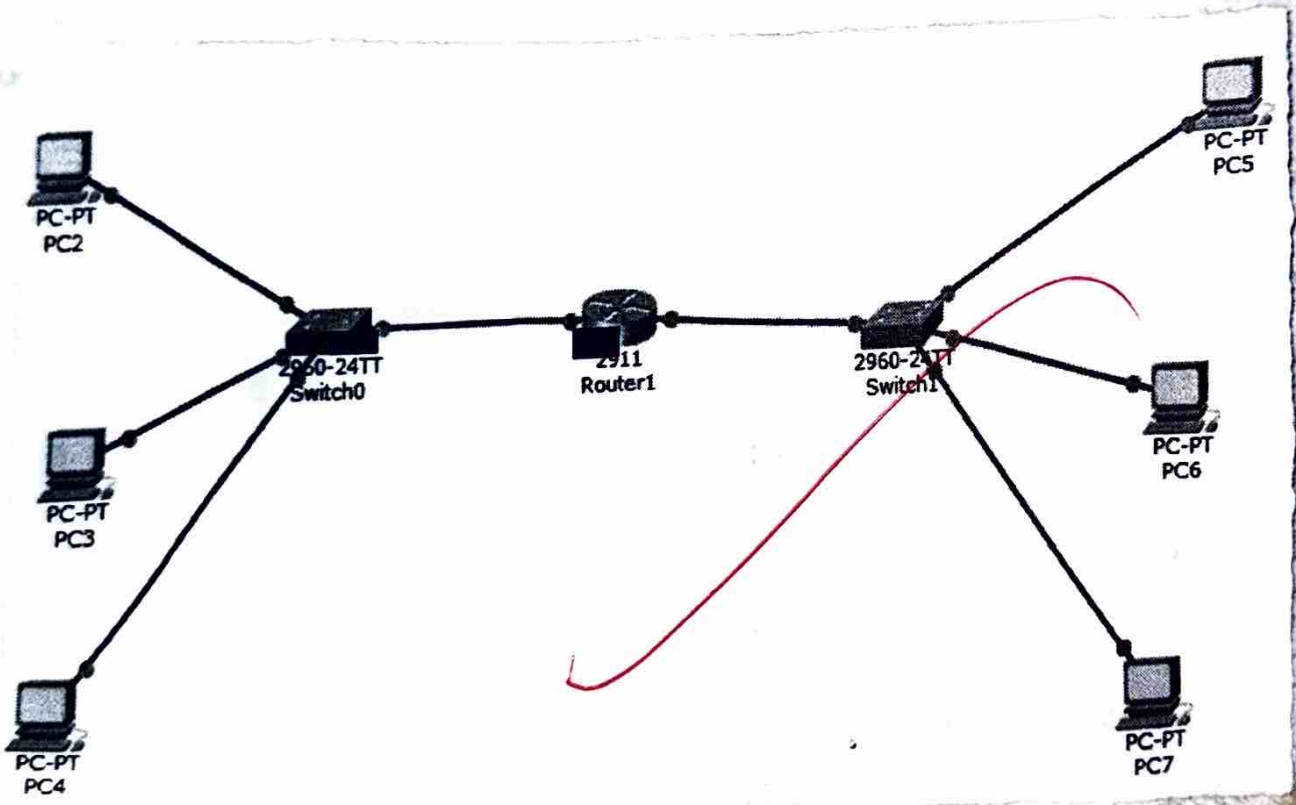

2. Wireless Router, DHCP server and Internet cloud.

1. Add a wireless router, PC, laptop, Cable modem, Internet cloud and cisco.com server
2. Connect the devices using appropriate cables
3. Set the wireless router SSID to Home network and enable DHCP
4. Configure the cisco.com server
5. Save the Packet Tracer file

Result:

The internetwork was successfully designed and configured in Cisco Packet Tracer Router communication, wireless connectivity, DHCP and internet connectivity was verified Successfully
